**OUR COMMITMENT IS TO CREAT LIVING COMFOT FOR YOU!**

**SUS 304  
LEAD FREE  
ANTI RUST  
ANTIBACTERIAL**

1

2

SUS 304 is internationally recognized as the most widely used material, with features as below: lead free, anti rust, antibacterial ability, no pollution to the water, and widely used in kitchen utensils, medical equipment and other fields.

Now SUS304 is more and more popular manufactured as faucet also, which will improve quality of our life.

\* Good-looking appearance: The surface of the 304 stainless steel faucet is treated with polishing, with a silver gloss, beautiful and bright, smooth and meticulous feel.

\* No damage: Stainless steel faucet is safe and lead-free, no corrosion and exudation, no odor or turbidity, it will not cause pollution to the water quality, and the water quality is clean and sanitary.

\* Long service life: Stainless steel is durable, and its life can reach 100 years after actual test. During this period, there is little need for special maintenance treatment.
